

The "Junior Tow N Mow" Gang Mower

- **Quality cut and presentation**
- **Low cost**
- **Easy to operate**
- **Easy to maintain**
- **66" [1.70m] cut width**
- **Effective ground weight**

This product is part of the RT Machinery Ltd "Tow N Mow" range of efficient, well designed, effective and robustly constructed trailed gang mowing units.

To complement the range, this low-cost but effective unit is ideal for paddocks and large area maintenance.

The cutting units are designed with optimum weight and performance in mind, to give an effective cut but with a convenient and cost-efficient pulling power requirement.

The height of cut is simple and quick to arrange, with "sight holes" available to maintain consistency over the three units.

To ensure a crisp and neat cut the bottom blade is equally quick and simple to adjust, using the system detailed over the page.

Tight turns can be undertaken with the units, with no loss of cut area.

Demonstrations are always recommended, so please contact your local vendor. [See over].

The units are designed to require minimal daily maintenance, with the remaining requirement being part of the annual service.
