

TEAM VIXEN GROUNDCARE SPRAYER

*British designed and built
for groundcare specialists*

TEAM VIXEN GROUNDCARE SPRAYER

The Team Vixen self-propelled sprayer has been designed for the greenkeeper or groundsman who requires efficient, reliable low-ground pressure application. It features a robust and simple design with the option to spray in either forward or reverse direction.

The **smooth action 24V powered axle** is highly responsive with fully adjustable forward and reverse speeds. Constant speed settings ensure accurate spray application.

Low ground pressure tyres are fitted as standard while an efficient axle differential eliminates the chance of turf scuffing. The motor is powerful enough to take slopes in its stride making Vixen highly manoeuvrable in all situations.

The **handle mounted controls** are clear and simple to use. Vixen is equally effective in forward or reverse mode, ideal for areas of limited access. Spring loaded 'break-back' booms protect against accidental damage.

120 litre polythene tank means less frequent refilling and, of course, no more sore shoulders from carrying a knapsack sprayer!

The standard **3m welded steel section boom** offers the flexibility of 3/2 or 1m spray widths. The triple nozzle assemblies are colour coded and fitted with anti-drip check valves.

The 14 LPM, **24V diaphragm pump** has an adjustable pressure system and gauge.

Quick charge battery system, handle mounted battery level indicator and pump flow valve for agitation or spray are all fitted as standard.

New for 2011:

Purpose designed transport trailer (non road legal) for moving from green to green

Detachable 2m covered boom system with folding ends to follow contours and colour coded triple nozzle assemblies

Optional extras:

2m covered boom

10m retractable hose reel and lance

Transport trailer (non road legal)

Foam/bout marker

6m hose and hand lance kit

Weights & Dimensions:

Weight: 126Kg without covered boom; 150Kg with 2m covered boom.

Width: 0.95m

Length: 1.5m
