Environmental Policy Statement 2020

As one of the largest independent Horticultural Machinery and Landscape Specialists in the UK it is imperative that we strive to minimise the impacts of our day to day operations.

Furthermore, we recognise that effective management of our environmental 'footprint' plays an essential role in maintaining our reputation amongst staff, customers, the public and regulators.

Our Aims

We aim to continually assess and mitigate our impact on the environment, where we can, helping us achieve our objectives to be one of the most environmentally aware Horticultural Machinery and Landscape Specialists and encourage "good practice" at all times.

Our Objectives

RT Machinery is committed to minimising its impact on the environment through all aspects of our business. We do this by:

- Development and Implementation of a Carbon Management and Reduction Plan to reduce or achieve target on our carbon emissions and to review year on year.
- Employ local people to deliver our services throughout the UK.
- Promote personal responsibility and effort on the part of our employees at all levels, as part of preventing and minimising damage to the environment.
- Manage our fleet vehicle movement through communication, logistical planning and flexible delivery and collection movements.
- Minimise Fleet vehicle and Plant operating costs and Maximise Efficiencies through monitoring fuel consumption, following servicing schedules, monitoring reliability and performance.
- Invest in affordable, highly efficient and innovative vehicles, plant and machinery, reducing fuel consumption and reliance on fossil fuels.
- Actively be aware of and keep up with industry and general technological advances in design technology, environmentally friendly, fuel saving and operating efficiencies.
- Integrate Sustainable Procurement Policies and Practices to ensure all of our staff, customers and suppliers meet and share our aspirations.
- Add value to communities by enhancing the environments in which we work, supporting Rural and Urban community schemes, investing in training and localisation.
- Recycle, re-use and return waste generated through our work operations and supplier chain, Recycle 100% of our green waste, wood chip and timber sections.
- Offer our customers an assured buy back and return facility to all equipment we sell and maintain.
- Supply only those machines that are 80% recyclable at end-of-life.
- Provide and display this policy and such written instructions as are necessary to assist in the implementation of our Environmental Policy.

Monitoring

The Policy will be monitored and reviewed on a regular basis by the IMS Manager and the Managing Director.
