

**BRIGGS & STRATTON  
CORPORATION**

TO: B&S Customers

August 10, 2020

SUBJECT: B&S Fuel Consumption Data

The indicated fuel consumption is derived from test engines under controlled conditions in a test laboratory. It is only an indicator of the average fuel consumption the customer may see while operating the equipment. The actual fuel consumption the end user experiences may differ from the values given below and depend on a variety of factors including, but not limited to, the variety of engine components (air cleaner, exhaust, charging, cooling, carburetor, fuel pump, etc.), application limitations, ambient operating conditions (temperature, humidity, altitude), and engine-to-engine variability.

The use of the fuel consumption data should always be accompanied by this qualification in a disclosure statement.

**Fuel Consumption Data:**

B&S Engine Model(s)	Fuel Consumption WOT	
Model 38677	RPM	l/hr
	2000	3.74
	2200	4.36
	2400	4.79
	2600	5.42
	2800	6.00
	3060	6.29
	3200	6.63
	3400	6.85
3600	7.20
