

LAWNNAIRE® IV with EST

TRUST RYAN®

With Easy Steer Technology, the Lawnaire IV maneuvers around highly landscaped areas—quickly and efficiently. Designed to rotate independently while driving, innovative tine assemblies allow you to steer without removing the tines from the ground—opening up a whole new world of productivity.

1. 3/4" (19MM) DIAMETER, STEEL CORING TINES

Unlike everyone else, our hardened alloy steel coring tines stay in the ground when you turn—and are durable enough to keep you out on the turf and out of the shop.

2. EASY STEER TECHNOLOGY

Save your strength with Easy Steer Technology and easily maneuver along paths and contours—even 180° turns. Outer tines rotate faster during turns to maintain deep core penetration without tearing up turf, increasing your productivity without sacrificing quality.

3. SIZED TO YOUR NEEDS

Facing tight terrain and landscaping? The Lawnaire IV will fit with its slim 19-inch aeration width.
