Husqvarna Fleet Services™

The FREE professional digital platform
to manage all your equipment

FLEET MANAGEMENT

Keep track of every
machine every day

AUTONOMOUS MOWERS

Get full control of your
robotic workforce

A digital tool that gives you total control

Husqvarna Fleet Services™ is our professional platform for digital services for connected machines and equipment. The services give you an overview of your entire fleet – including each machine's geographical position, work performance and technical status – right in your smartphone, tablet or laptop.

The output from Husqvarna Fleet Services™ brings potential insights adding to your organisation's efficiency, whether you're a sports field or golf course manager, facility manager, council/public green space manager, or running a landscaping business.

Join forces in the digital workspace

Husqvarna Fleet Services™ includes a range of functions that digitise many of your currently time-consuming tasks, helping you schedule smarter, stay organised, and cut costs. An ideal tool for companies with multiple users in different roles.

MANAGERS

You have full access to all functions. You monitor the fleet and get the insights in productivity and cost. You handle account settings and add new users.

TECHNICIANS

You take care of machine installations, maintenance, settings, service logs and firmware updates. You have full access to all machine functions, including performance tracking, and service and repair reports.

OPERATORS

You have access through the mobile app to see information about your machines' status and location. You handle basic machine controls and act on errors.

Save time and money with a smooth and efficient operation

You'll know the value of preventive maintenance for avoiding costly downtime and repairs, as well as for allowing your equipment to last longer. With Husqvarna Fleet Services™, you can set up a maintenance strategy for each machine group.

Information about where problems occur and how often, gives you valuable insights to continuously adjust and improve your operation.

Autonomous mowing the professional way

GEORA™ and Automower® robotic mowers always deliver superb results, regardless of area or complexity. The professional robotic mowers from Husqvarna enable autonomous mowing on any kind of turf, from smaller lawns to multiple sports fields. Husqvarna Fleet Services™ is an efficient tool for managing your entire robotic workforce's mowing status – easily accessible in your smartphone or laptop.

SMOOTH REMOTE MANAGEMENT

Manage your lawn maintenance directly from your phone, tablet or laptop. The smooth and efficient way to a perfect cutting result with minimal disturbance for your clients or guests.

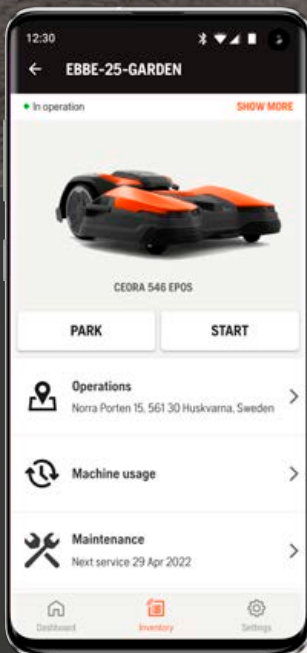

CONTINUOUS OPERATIONAL INSIGHTS

Evaluate short term during the season – get continuous operational insights to make sure that all robotic mowers run as smooth as they should.

BASE YOUR INVESTMENTS ON FACTS

Evaluate long term at the end of the season – collect and analyse data on the season's results, as a base for decisions about the coming season.

10-YEAR DATA PLAN INCLUDED

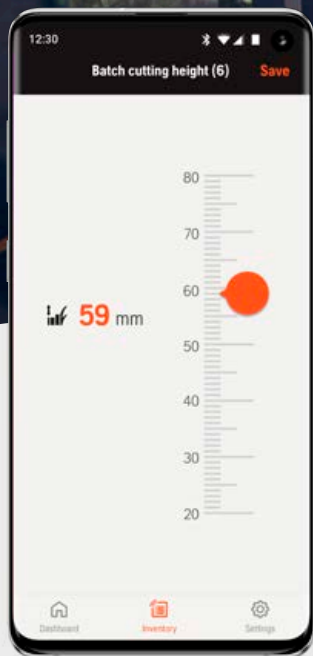

Connectivity with unlimited reach

When you invest in one of our professional robotic mowers, we include a 10-year data plan for cellular communication, so you can use Automower® Connect and Husqvarna Fleet Services™ throughout its product life. (Please note that we can only guarantee the functionality of the product itself, and not the uptime or coverage of the 3rd party data connection.)

Full control and scheduling from anywhere

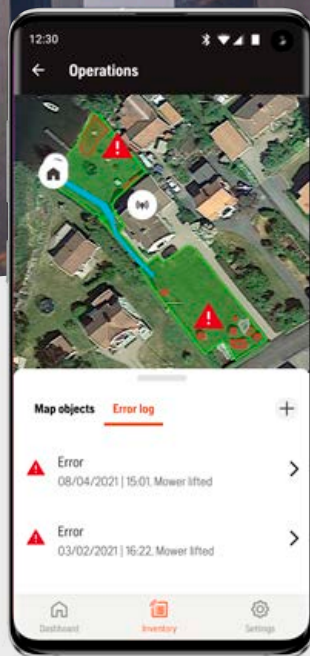

When you invest in our professional robotic mowers, you also get access to Husqvarna Fleet Services™ – a digital tool allowing you to easily monitor and control them from your smartphone, tablet or laptop. Just as easy as it should be.

REMOTE MANAGEMENT

Conveniently control from anywhere

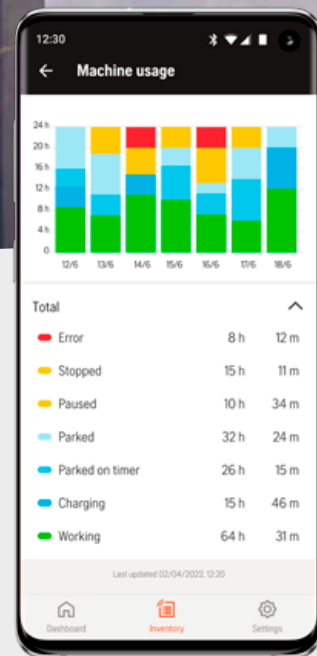

Perfect when you want to adjust the mowing schedule or cutting height, or park them before the storm arrives. And thanks to tagging, you can exert exact control over all your mowers, grouping them and issuing batch commands, directly from your smartphone app.

VALUABLE INSIGHTS

Make sure they all run as smoothly as they should

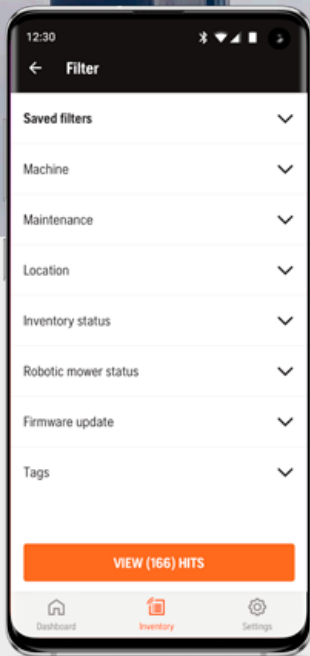

Should anything happen, such as an unexpected standstill for one mower, you'll immediately receive a notification to your phone. Information about where problems occur and how often give you valuable insights to continuously adjust and improve the installation.

DETAILED INFORMATION

Review their performance on a daily basis

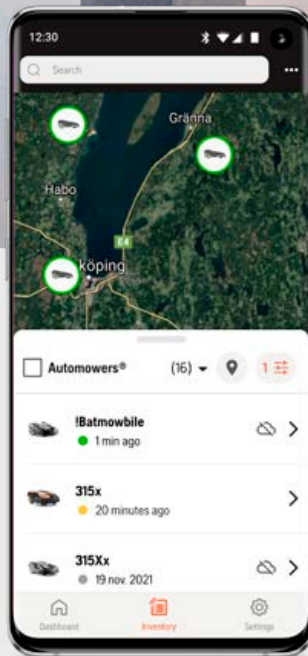

Through "Machine usage", you can review daily user data for more insights on whether unplanned stops occur too often or if the mower's size is appropriate for the work area. The info is summarised in an easy and accessible way, helping you make your fleet usage more efficient and productive.

TAGS

Group your mowers to handle them efficiently

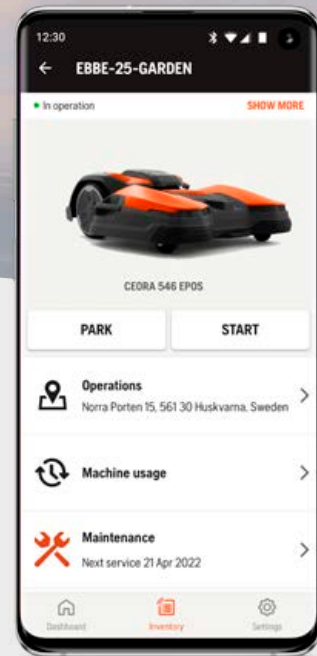

For larger fleets, mowers can be grouped and then assigned to different teams or sites for easier handling. It's not possible to use tags to manage what each role can control.

MAP VIEW

Always keep track of their exact locations

Want an overview of all your robotic mowers? Just check the map view. Thanks to the built-in GPS, you always know the exact location and status of every robotic mower. On the map you can select multiple mowers and issue a command to all mowers in a specific area at once.

SERVICE REMINDERS

Be notified when it's time for service

You can get service reminders based on actual operating time or calendar time, to make sure your equipment is always in great shape.

The easy way to keep track of and optimise your fleet

Managing a large, mixed and widespread fleet of machines and other equipment is a challenging task for any landscaping business or council. With Husqvarna Fleet Services™ you can easily monitor, collect and analyse the data from each machine on geographic position, running hours, and service history. This helps you ensure that your fleet is optimally composed, in perfect technical condition and efficiently utilised.

Get the insights that will help you improve your business

BASE YOUR PURCHASES ON FACTS

The machine usage report tells exactly how many of your machines you actually use – you might be able to do the same job with fewer of them. Since you know the engine hours of each piece of equipment, you can easily identify the ones that will last another season.

ANALYSE DATA TO INCREASE PRODUCTIVITY

The more you run your equipment each day, the more you get done. By looking into the daily runtime of each machine, you'll be able to identify time thieves that get in their way, and get more done.

SPEND LESS TIME MANAGING YOUR EQUIPMENT

Husqvarna Fleet Services™ keeps an eye on your equipment for you. Weekly reports and messages will alert you if there's anything you need to deal with. This saves time.

REDUCE YOUR CO₂ EMISSIONS

Reducing CO₂ emissions is an important target for contractors as well as municipalities. The Carbon Footprint Calculator provides you with the data and insights you need to take action – and to report your progress.

Bluetooth® wireless technology

CONNECT EASIER WITH BUILT-IN CONNECTIVITY

Many of Husqvarna's products have integrated connectivity thanks to built-in Bluetooth® wireless technology. You get all the benefits from the fleet management system – operational insights and operation log – directly from the product and you can also update firmware directly from your app. This also means that your product is future-proof and ready for any product updates.

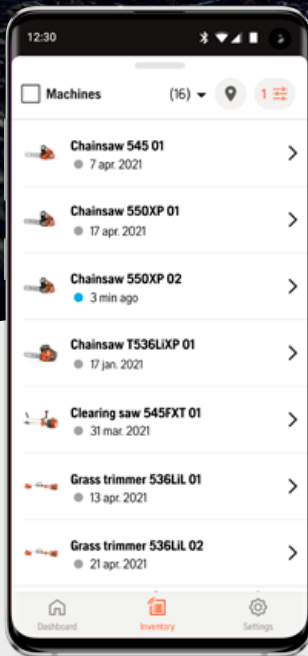

OR ATTACH A SENSOR TO ANY PIECE OF EQUIPMENT

Another way to connect a piece of equipment, is installing a small sensor. You can add sensors to all sorts of equipment, even those from other manufacturers.

A multiple of features that keep you in control

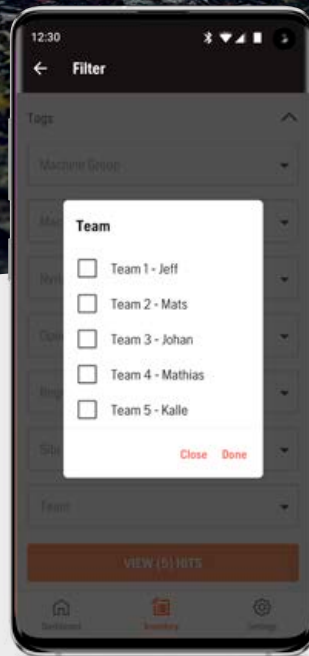

Save time and money by connecting your equipment to Husqvarna Fleet Services™. Easily keep track of what you have and where, and if anything needs to be serviced or replaced. Offering you a complete overview of your operations.

INVENTORY CONTROL

All your equipment in one place

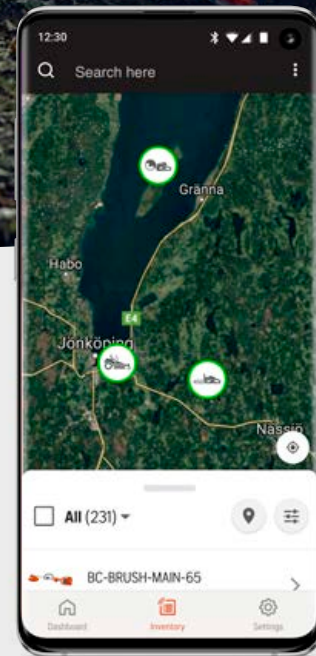

Don't rely on paperwork. With Husqvarna Fleet Services™, you just check the inventory list, and you know exactly how many machines you have of each type. Give them unique names, and you can easily tell which is which.

TAGS

Make machine categories

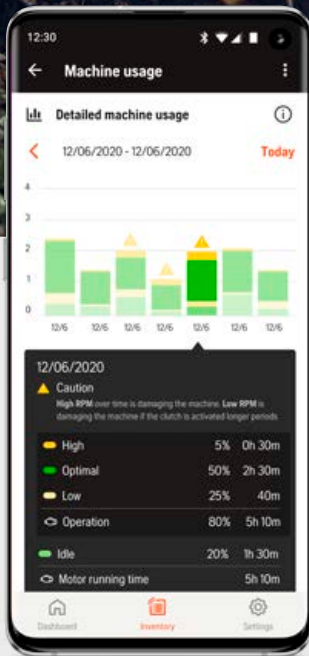

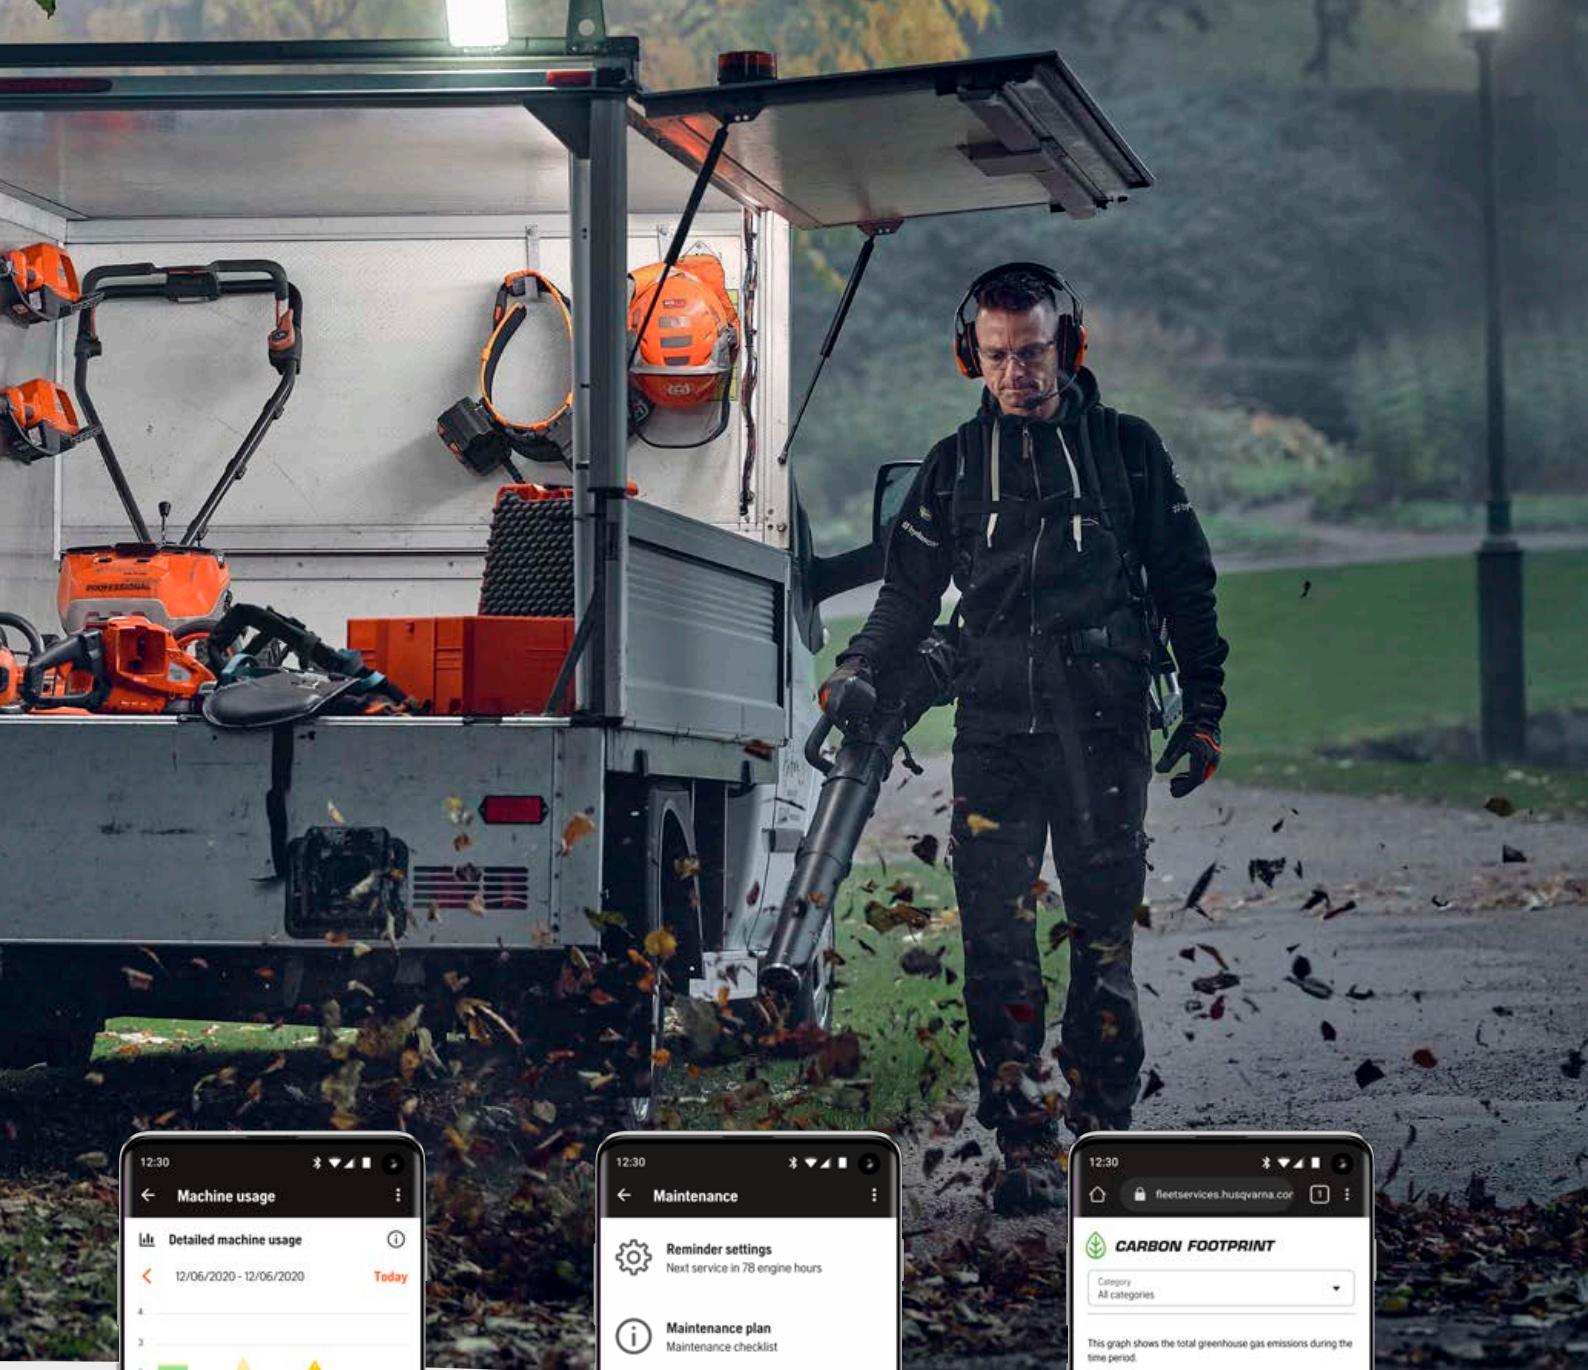

By using tags, different machines can be categorised and "tagged" for different purposes. Examples can be "tagging" machines for different locations, to different teams, etc. This grouping provides an easier handling in the everyday work for the different roles in Husqvarna Fleet Services™.

MACHINE LOCATION

Track them all on the map

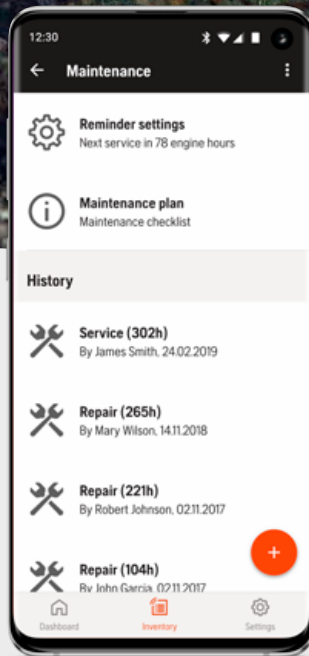

Always keep track of where you last had your equipment. As soon as a connected machine is within Bluetooth® distance from the app, its location is registered. So whenever you're looking for a machine, you just check the map to find out if it's in the storage, away for service or out working.

MACHINE STATISTICS

See when and how much you've used it

Since the system tracks the engine hours and usage of every machine, you can easily get an overview with Husqvarna Fleet Services™. You can produce a workday log with detailed information on how many hours they have been used every day.

SERVICE OVERVIEW

Service history and notifications

By using Husqvarna Fleet Services™, you always have access to the service history for each piece of equipment, making it much easier to keep track of its status and troubleshoot in case of a breakdown. You can also get service reminders based on actual engine hours or calendar time, to make sure your equipment is always in great shape.

CARBON FOOTPRINT

A handy tool for reducing CO₂ emissions

The Carbon Footprint Calculator provides you with the data and insights you need to take action – your total CO₂ emissions in kilograms, and which types of machines they come from.

Husqvarna®

BUILT-IN BLUETOOTH® TECHNOLOGY

Connect your machines the easy way

A growing number of Husqvarna products for professional use are offered with integrated connectivity, equipped with built-in Bluetooth® wireless technology. This makes it even easier for you to have your entire fleet connected, and to utilise all the benefits this brings for your business.
