# Welcome to the SISIS Brochure

For 90 years the world's finest grounds staff, greenkeepers and gardeners have been choosing SISIS, the world's best turf maintenance equipment. The reason more people trust SISIS is that, like our users, we've always refused to compromise on quality.

This commitment explains why even today every part of every machine is designed and built with pride in Derbyshire, England, incorporating only the finest materials and assembled by our team of engineers.

Investment in the SISIS brand continues to be at the heart of everything we do. State-of-the-art facilities, high productivity manufacturing, training facilities for staff and customers, latest production systems, exhibitions, educational seminars and of course new products, designed on the latest computer software systems.

2023 will see the next generation of SISIS equipment. Battery powered, no compromise alternatives to our petrol machines, with super low CO2 footprint helping everyone towards the carbon neutral goal.

At SISIS we have long understood that service and aftersales must be as superb as the equipment for customers to achieve maximum performance and first class results. Our dealers and distributors, both in the UK and overseas, are trained in installing and maintaining all SISIS products to give you first class service wherever you are.

We hope you enjoy looking through our products and, if at the end you're not certain what makes our machines so different, we ask you give one a try.

Ian Howard – Managing Director

# Built with 90 years experience

Our team work harder to offer more support to more customers more of the time – whether at grass roots or with professional users. That’s why you’ll see our machines on the best pitches, greens and fine lawns around the world.

## Solid Engineering, with a unique feel...

Our reputation for innovation began back in 1932 and has continued ever since.

Through our ongoing development of cutting edge ideas our expertise will help the way natural and synthetic playing surfaces are prepared and maintained.

At SISIS every design detail makes a difference to performance. From industry firsts such as the patented contra-rotation principle developed in the 1950’s to the more recent Aer-Aid system that’s revolutionized the ground care industry, you can be sure engineering innovation runs through every SISIS machine.

[www.sisis.com](http://www.sisis.com)

“  
The TM1000 is  
the perfect all  
rounder.”

C. Brain, Grounds Manager

We had a trusty SISIS Auto Rotorake but it was over 25 years old, and it needed replacing.

We didn’t even look at anything else. It is a staple piece of equipment for cricket clubs and there is nothing else on the market to challenge it in my opinion.

Vic Demain, Head Groundsman  
Durham CCC

In a school environment, I need to buy equipment that is versatile and can do different jobs on multiple surfaces, the SISIS TM1000 ticks all the boxes.

Christian Brain, Grounds Manager  
Cheltenham College

“  
The Autoslit  
gives a linear  
aeration cut  
through your  
greens”

M. Finch, idverde

I chose the SISIS Autoslit purely through the research I have been doing...

on different golf courses and other fine turf surfaces – I felt that it would be the best product for this particular site.

Mike Finch, Head Greenkeeper  
idverde

Its versatility is its best feature. We oversee with the Variseeder three times a year on the greens, oversee on the tees as much as we can, and the surrounds too.

I also like how you can use it with different types of seed. If you can buy one machine that can do multiple jobs, then it is a bonus in my opinion.

Simon Marshall, Head Greenkeeper  
Wishaw Golf Club

# SISIS Flexibrush key to fantastic fairways

Worm cast dispersal, dew removal, standing grasses up prior to mowing and excellent presentation – the versatile SISIS Flexibrush is having a positive impact on the fairways at the Herefordshire Golf Club according to Head Greenkeeper Jeremy Browne.

Jeremy has seen many changes in the 31 years he has been at the club, but he believes the arrival of the new owners is proving to be one of the most beneficial.

“The new owners have come in and are really starting to make a difference,” he said. “They have invested in the club house which is having a renovation; they are planning on introducing more drainage around the course and they are committed to investing in new equipment.”

As an ex-mechanic, Jeremy has always prolonged the life of his greenkeeping equipment by servicing and repairing it himself, however he admitted that the opportunity to get his hands on new machinery was music to his ears.

“I like repairing machinery but all the time I’m doing that, I’m not out on the course,” he said. “I was delighted when the owners came to me directly and asked what I needed. I told them that to keep me out on the course, then I needed the most reliable equipment.”

With fairways being his first port of call, and with an increasing amount of worm casts appearing, Jeremy narrowed his search down to two possible machines.

“We thought that the SISIS Flexibrush would be the better product for us,” he said. “With all the moving brushes it seemed to follow the contours and the undulations on the course a lot better than the alternative.”

The SISIS Flexibrush is a tractor mounted brush which is equally effective dispersing top dressing and removing excess material on natural turf or synthetic surfaces. The versatile Flexibrush can also be used for dew dispersal and striping for improved presentation. It has a 5.35 metre working width, its brush sections ‘float’ to follow ground contours and the outer sections fold for transport and storage.

“Wormcasts was the main issue, obviously they smear when you are cutting and can be a bit of a nuisance,” said Jeremy. “With less chemicals now available, we must look at going back to more effective natural ways and the SISIS Flexibrush was the best solution because it can be used for multiple tasks.”

“For example, in the winter when we are unable to cut the grass, we can use the Flexibrush to stripe and ensure that the fairways are nicely presented. We have also used the Flexibrush to stand the grasses up before cutting because it provides us with a better finish; and it is great for knocking the dew off.”

“The size and width of the machine are ideal,” continued Jeremy. “We can cover larger areas and it folds up so it can be stored nicely, and you can get through small gaps if needed.”

“I wanted something reliable, and I have that in SISIS. The Flexibrush is certainly an important part in our armoury.”

*Jeremy Browne.*  
Head Greenkeeper

Pedestrian Scarifier

# Auto Rotorake MK5

Easy to use scarifiers for maximum thatch control and removal

SISIS pedestrian scarifiers use contra-rotating reels for a clean consistent performance, perfect for fine turf surfaces.

Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns | Local Authority & Contractors

Lightweight and easy to manoeuvre, this pedestrian scarifier has been specifically designed to allow a range of interchangeable reels to be used for all year round maintenance.

Maximum thatch control and removal helps to reduce the risk of disease, encourage 'up right' grass growth and a 'true' playing surface.

Unique features:

- Contra-rotating reels with specially designed tipped blades for a clean consistent performance
- Quick change reels for thatch control and removal all year round and other essential maintenance tasks
- User friendly operator presence controls designed for maximum operator safety
- Micro depth adjustment control positioned on the handle for easy use
- Incorporate independent drive to the wheels and reel for effortless performance
- Slick tyres and full differential ensure ease of turning and minimal surface marking.

Pedestrian Scarifier

# Rotorake 600HD & 600HDX

Heavy duty scarifier and linear aerator recommended by professionals

SISIS pedestrian scarifiers use contra-rotating reels for a clean consistent performance, perfect for fine turf surfaces.

These heavy duty scarifiers are equally at home when used for regular routine use at a shallow setting or a deeper setting when required.

They also contribute to aeration and compaction relief by cutting clean, continuous slits to assist water and air absorption. The 600HDX is ideal for use on tough warm season grass species.

### Unique features:

- Contra-rotating reels with specially designed tipped blades for a clean consistent performance
- Quick change reels for ultimate thatch control and removal all year round
- User friendly operator presence controls designed for maximum operator safety
- 6 forward speeds for efficiency under varying conditions and depth
- Reverse gear for manoeuvrability
- Incorporates independent drive to the wheels and reel
- 600HDX does not incorporate a collection box

Model:	Rotorake 600HD	Rotorake 600HDX
Code:	FS1246	FS1279
Working width:	600mm (24")	600mm (24")
Engine:	Honda GX390	16hp V-twin engine
Working depth:	30mm - with option to go deeper	30mm - with option to go deeper

For details of reels go to Page 11.

## Rotorake Easy to Change Reels

Reels

MK5 600HD 600HDX

### 1mm tungsten tipped verticutter reel

FS1098 n/a n/a

1mm replaceable, wear resistant tungsten tipped blades (12mm spacing) can be used throughout the season. Can also be used for light scarifying.

### 1mm tungsten tipped verticutter reel

n/a FS1156 FS1156

1mm replaceable, wear resistant tungsten tipped blades (12mm spacing) can be used throughout the season. Can also be used for light scarifying.

### 1.6mm scarifying/thatch removal reel

FS1093 n/a n/a

1.6mm replaceable, wear resistant tungsten tipped blades (20mm spacing). Ideal for pre & post playing season renovation work.

### 2mm scarifying/thatch removal reel

n/a FS1155 FS1155

2mm replaceable, wear resistant tungsten tipped blades (24mm spacing). Ideal for pre & post playing season renovation work.

### 2mm scarifying/saw blade reel

n/a FS1253 FS1253

Specially designed blades (24mm spacing), with six 2mm wear resistant tungsten tips which are ideal for heavy duty deep scarifying. Ideal for cricket squares and other similar compacted surfaces.

### Thatch control reel

FS1095 n/a n/a

Sharpened offset triangular blades (6mm spacing) used regularly throughout the playing season to control lateral growth and improve green speed.

### Verticutter

FS1200 FS1252 FS1252

Sharpened triangular blades, (12mm spacing) used regularly throughout the playing season to control lateral growth and improve green speed.

### Brush reel

FS1088 FS1157 FS1157

Used throughout the year for debris collection and clean up. Also used prior to mowing to stand grasses up and improve cut quality.

### Multi Dense/Synthetic brush reel

FS1090 FS1275 FS1275

Used throughout the year for debris collection and clean up. Also used prior to mowing to stand grasses up and improve cut quality.

### Rolaspikes/Sarel roller

FS1113 FS1158 FS1158

Provides fast & effective surface aeration. Used during the playing season enables penetration of air, water and fertiliser.

### Faze-Mo reel

n/a FS1159 FS1159

Heavy duty reel used for removing unwanted surface matter such as thatch and weeds and surface levelling.

\*Please note reels are available for the Rotorake 450, Auto Rotorake MK4 and the Trio Rotorake - please contact the office on 01332 824777 or your nearest dealership.

Tractor Mounted Scarifier

# Rotorake TM1000

## Combined scarification and linear aeration with heavy duty power

SISIS pedestrian scarifiers use contra-rotating reels for a clean consistent performance, perfect for fine turf surfaces.

Ideal for:

Football, Hockey, Rugby | Cricket |  
Tennis | Golf | Lawns | Local  
Authority & Contractors

Discover

A specially designed tractor mounted unit with a choice of five quick release interchangeable reels to aid the removal and control of thatch and help to reduce standing surface water by improving water infiltration.

Features include a Contra-rotating reel for a clean consistent performance with a selection of various blades to suit key tasks.

The weight of the collection box and material is carried by the main frame on the front roller and independent from the reel, so when in use the additional weight does not force the reel to scarify deeper than has been set.

Unique features:

- Floating unit to follow ground contours
- Fast ground coverage
- Interchangeable reels and optional variable spacing allows key tasks such as scarifying, linear aeration, verticutting and brushing to be carried out
- Quick release reel system
- No tool depth setting for fast, simple adjustment
- Contra-rotating reels ensure a clean consistent groove
- Standard Cat. 1, 3 point linkage
- When used without collection box, scarifying unit can be off set so that the wheels do not run over the removed thatch
- Optional hydraulic tipping kit

Contra-rotating reel ensuring excellent performance

Easy to use manual tip system

Large capacity collection box, shown with optional hydraulic tip kit

<b>Model:</b>	<b>Rotorake TM1000</b>
Code:	<b>FS1258</b>
Working width:	1000mm (40")
Tractor power requirement:	18-20hp minimum
Working depth:	50mm (2") max (with scarifying reel)

Includes collection box. For details of reels see below.

Tractor Mounted Scarifier

# Veemo MK2 and Veemo HD

Minimum surface disturbance with maximum thatch removal – designed for large areas

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Purpose designed, triple mounted hydraulic driven scarifiers using strong cutting blades for maximum thatch removal and minimum surface disturbance.

The three independently floating heads follow ground contours closely without scalping.

Depth of cut is infinitely variable by means of a locking micro-adjuster on each unit. A choice of 1mm or 2mm tungsten tipped blades are available to carry out scarification and verticutting requirements.

The Veemo HD is ideal for warm season grass species.

### Unique features:

- 3 fully floating units mounted on a chassis with support wheels to follow ground contours
- Efficient hydraulic system with large volume tank
- Direct hydraulic motor drive to each reel unit for maximum power transmission without belts
- Tool free depth setting by micro control on each unit means fast, simple adjustment
- Standard Cat.1, 3 point linkage for fast, easy coupling to tractor unit
- Integral heavy duty oil cooler for all climate conditions
- Fast ground coverage saving time and money

## Pedestrian Aerators

# Dart & Supaturfman

Helping to keep grass in a healthy condition. By the pioneers of aeration techniques.

### Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns | Local Authority & Contractors

Image shows Dart model

Operator friendly and easy to manoeuvre range of vertical and drum type aerators.

These machines are ideal for relieving soil compaction, allowing water and oxygen to the root zone, improving drainage and helping the turf become drought resistant. The interchangeable tines allow for a variety of aeration methods to be carried out on a regular basis with minimal surface disturbance. Ideal during and out of season.

### Unique features:

- Vertical penetration and withdrawal with minimal surface disturbance
- 'Easy lift system' for effortless turning and transport
- Selection of interchangeable tines

Dart

Model:	Dart
Code:	FS1231

### Tractor Mounted Aerators

# Javelin & Javelin Aer-Aid 1500

Aeration with a difference

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Javelin Aer-Aid complete with rear roller

Proudly used by  
Royal Wellington Golf Club

The SISIS Javelin and Javelin Aer-Aid machines are specially designed tractor mounted vertical action aerators for use on both fine and outfield turf.

The machines can be used all year round due to the large selection of tines helping to break up compaction allowing water, air and nutrients to penetrate the root zone. Consistent use helps to produce a surface that is less affected by the adversities of weather conditions leaving minimal disturbance.

The Aer-Aid system injects air directly into the root zone speeding up the aeration process, moving air uniformly throughout the root zone for complete aeration – not just where the tines have penetrated.

The cam trigger mechanism ensures that the air is always expelled at the bottom of the tine penetration enabling treatment to be targeted precisely.

"A breath of fresh air"

#### STRI trials demonstrated the Aer-Aid system:

- Significantly reduces surface and soil compaction
- Increased water infiltration rates
- Manages soil based issues
- Enhances root development
- Helps to limit turf damage caused by disease when integrated in a management programme
- Quick, single lever tine depth setting for easy adjustment

#### Unique features:

- Fast forward speed for excellent productivity
- Quiet in operation
- When working at 75mm (3") spacing air is introduced at a rate of 88 litres (3cu.ft) per minute
- The air injection tines are specially designed to use the maximum air available from the compressor which produces clean, fresh air at a constant rate
- Minimal maintenance required due to bearings fully sealed and no grease nipples in the drive system

Model:	Javelin Aer-Aid
Code:	FS1066
Action:	Vertical Air Injection
Working width:	1500mm (60")
Working depth:	127mm (5")
Tractor power requirement:	30hp minimum.

Includes set of 10 air/non-air tines and rear pressure roller

Model:	Javelin
Code:	FS1256
Action:	Vertical
Working width:	1500mm (60")

## Tractor Mounted Aerators

# Multitiners

Helping to restore and maintain playing surfaces all year round

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Multitiner 1.8m

Proudly used by  
De Montfort University

Simple design with low maintenance, the Multitiners are drum type tractor mounted aerators for use on fine turf surfaces and sports fields and are well suited to performing a range of various aeration methods such as solid, chisel and hollow tining. Fast and effective, these aerators will leave minimal surface disturbance.

### Unique features:

- Choice of interchangeable tines for different aeration methods
- Quick release guard cover
- No 'tools required' quick release tines
- Rear spring loaded pressure rollers to follow undulations (1.2 version only)
- Large rear pressure roller that can be used for extra weight in hard conditions (1.8 version only)
- Tine drums have independent rotation
- 3 point linkage for use on most compact tractors

Model:	Multitiner 1.2	Multitiner 1.8
Code:	FS0546	FS1179
Action:	Drum type	Drum type
Working width:	1200mm (48")	1800mm (72")
Max working depth:	100mm (4")	100mm (4")
Tractor power requirement:	20hp minimum	35hp minimum

Unit includes rollers, but not tines

The Rolaspikes is a tractor mounted sarel type roller which is ideal for surface aeration assisting with the absorption of water, air and nutrients into the turf. Also useful as part of an overseeding programme preparing the surface for seed.

Can be fitted to the SISIS Singleplay, Twinplay, Tri-play or Quadraplay combination frames for easy attachment to any tractor.

### Multitiner 1.2

#### Optional tines\* - set of 96

100mm solid tine	SETX96-D6728
100mm chisel tine	SETX96-D2109

Pedestrian Slitter

# Autoslit

Easy to use slitter  
with minimal  
surface marking

Ideal for:

Football, Hockey, Rugby | Bowls,  
Croquet, Tennis | Golf | Lawns |  
Local Authority & Contractors

Discover

A purpose built pedestrian deep slitter which is suitable for use on fine or outfield turf helping to reduce compaction and assist the percolation of surface water.

The deep clean slitting action cuts through the turf and the root zone leaving a thin slit on the surface and minimal surface disturbance.

These slits encourage strong, healthy root growth of the grass plants, improving tolerance to drought conditions and promoting more rapid recovery after damage in play.

Easy to use the Autoslit incorporates a rear smoothing roller and uses a cantilever system to lift the machine out of operation.

### Unique features:

- Choice of interchangeable slitting tines to suit different ground conditions
- The angle of the tines and spiral design of tine shaft assist penetration giving maximum underground cultivation with minimum surface disturbance
- Tine plates have a wide rim to reduce marking in soft or undulating conditions
- Safety guard is quickly removed for easy tine change
- For ease of use, and to comply with EU lifting regulations, the patented design uses a cantilever system to lift the machine out of work
- Incorporates rear smoothing roller
- Fine turf sharpened tines included as standard

<b>Model:</b>	<b>Autoslit</b>
Code:	<b>FS0819</b>
Working width:	900mm (36")
Working depth:	150mm (6")
Engine:	Honda GX160

Pivoted smooth rear rollers for ease of movement and a 'finishing touch' to the slitting process

The cantilever system for lifting the machine out of operation

User friendly operator controls

### Optional Tines:\*

Optional tines (24 per unit)	
152mm heavy duty/outfield	<b>D7493</b>

## Tractor Mounted Deep Slitters

# Multislit, Maxislit & Megaslit

## Optimum aeration for maximum health

Deep slitting aerators work... with minimal surface disturbance for the ultimate finish.

Ideal for:

Football, Hockey, Rugby | Cricket |  
Golf | Local Authority & Contractors

Image shows 1.8m Maxislit

Built to last, a range of tractor mounted deep slitters for both outfield and fine turf.

Different working widths and varying maximum depths allow a model to be selected to suit any tractor and most applications.

These machines are simple in design and low maintenance. Their thin sharp blades cut through the turf and root zone leaving only a slit on the surface but giving deep optimum sub soil disturbance.

Regular slitting encourages strong, healthy root growth of the grass plants, improving tolerance to drought conditions and promoting more rapid recovery after damage in play.

### Unique features:

- Choice of interchangeable slitting tines to suit different ground conditions (Multislit versions only)
- The angle of the tines and spiral design of tine shaft assist penetration giving maximum underground cultivation with minimum surface disturbance
- Tine plates have a wide rim to reduce marking in soft or undulating conditions
- Rollers fitted as standard to all models
- Strong shatterproof boron steel tines

Combination Implement Frames

# Singleplay, Twinplay, Tri-play & Quadraplay

## Performance you can rely on

Versatile maintenance equipment trusted by professional grounds staff for a variety of applications.

Ideal for:

Football, Hockey, Rugby | Cricket |  
Golf | Local Authority & Contractors

Image shows  
Quadraplay frame with  
four implements

## Implement Mounted Frames

Single pass maintenance system which accepts a variety of implements for use on both turf and hard porous surfaces. Up to four operations can be carried out simultaneously with this simple and versatile system.

All implements are fully interchangeable and independently adjustable to give the desired effect and can be raised out of use when not required.

Connects to any tractor with 3 point linkage and utility trucks with suitable frame.

Singleplay frame suitable for 1 implement

**Model: Singleplay Complete Frame**

Code: **FS0870**

Twinplay frame suitable for 2 implements

**Model: Twinplay Complete Frame**

Code: **FS1237**

Tri-play frame suitable for 3 implements

**Model: Tri-play Complete Frame**

Code: **FS1236**

Quadraplay frame suitable for 4 implements

**Model: Quadraplay Complete Frame**

Code: **FS0758**

## Towed Implement Frames

Ideal for towing behind small compact tractors when hydraulic lift is not available. The system can use implements singly or in pairs by using the optional extension arms.

### Towed Single Implement Frame – Manual Lift

Code: **FS1118**

### Towed Single Implement Frame – Electric Lift

Code: **FS1238**

### Twin Implement Extension Arms

Code: **FS1123**

For details of implements go to Page 28

# Easy to Attach Combination Implements

Implements	1.2m	1.8m	2.4m
<b>Deep Slitter</b> Relieves compaction helping to assist in the absorption of water, air and nutrients into the root zone with minimal surface disturbance. Ideal for pre-season and end of season maintenance (for towed implement frame only).	FS1162	n/a	n/a
<b>Spiker Slitter</b> Fast method of surface aeration allowing air and water to percolate into the root zone. Ideal for use during the playing season and before fertilizer applications and irrigation.	FS0561	FS0764	FS0774
<b>Rolaspikes</b> Ideal for surface aeration during the playing season allowing water and air into the root zone and integrating fertilizer into the surface. Also useful as part of an overseeding programme.	FS1271	FS1169	FS1267
<b>Straight Brush</b> Used for standing grasses up, removing excess dew, enhancing presentation and brushing in dressings. Ideal on natural grass and hard porous areas. *See note below table	FS0865B	FS0765B	FS0775B
<b>Zig Zag Brush</b> Angled brush sections increase the brushing intensity. Ideal for removing dew, standing grasses up, working in top dressing and improving presentation. Ideal on natural grass and hard porous areas. *See note below table	n/a	FS0869B	FS0516B
<b>Flexicomb</b> Ideal for standing up grasses and grooming, the easily adjusted crossbar increases or decreases the Flexicombs intensity. *See note below table	FS1163	FS1134	FS1277
<b>Intermediate Rake</b> 4mm diameter tines. Ideal for regular use on hard porous surfaces, gravel paths and running tracks.	FS1270	FS0759	FS1268
<b>Tilth Rake</b> 5.5mm diameter tines. Ideal for compacted hard porous surfaces, gravel paths and running tracks.	FS1269	FS0760	FS1266
<b>Spring Tine Grooming Rake</b> 7mm diameter spring tines for grooming and raking. Ideal for standing grasses up to improve presentation and remove thatch, useful for creating a tilth on worn areas. Also suitable for use on hard porous surfaces. *See note below table	FS1148	FS0761	FS0771
<b>Fine Grooming Rake</b> 5mm diameter spring tines for grooming and raking. Ideal for standing grasses up to improve presentation and remove thatch, useful for creating a tilth on worn areas. Also suitable for use on hard porous surfaces. *See note below table	FS1272	FS1075	FS1076
<b>Levelling Lute</b> Ideal for levelling and grading hard porous surfaces.	n/a	FS0762	FS0772
<b>Roller</b> Ideal for light rolling of all surfaces and enhancing presentation. Used on natural grass and hard porous areas.	FS0863	FS0763	FS0773
<b>Grader Plate</b> Ideal for levelling greyhound tracks or other sand based surfaces leaving a lightly compacted polished finish.	n/a	FS1110	FS1109

Tractor Mounted Seeder

# Variseeder 1300

High build quality,  
efficient output with  
low maintenance

Ideal for:

Football, Hockey, Rugby | Cricket |  
Golf | Local Authority & Contractors

A compact and versatile tractor mounted overseeder ideal for renovation and repair work.

The studded roller prepares the seedbed by creating thousands of little "plant pots" to receive the seed without linear grooves that can disturb play. Variable seed rates and options on discharge rollers allow different seed varieties to be introduced to the sward.

Unique features:

- Seeding rate is variable and is simple and accurate to set by Zero max box
- Fast work rate
- Overseeding carried out without taking ground out of play
- Studded roller creates seed bed
- Low maintenance with few wearing parts
- Integral weight bar
- Standard cat.1, 3 point linkage for easy fitting to any tractor
- Can be adapted for use with most common power units for golf and sports ground work

Zero Max Box for variable seed rates

Studded roller for minimal surface disturbance and creating the seedbed 'plant pots'

Transport trolley - storage trolley for ease of movement in the shed/workshop

Grooved discharge roller - two discharge roller options for pure bent, rye grass/fescue

<b>Model:</b>	<b>Variseeder 1300</b>	
<b>Code:</b>	<b>FS1056</b>	<b>FS1245</b>
<b>Complete with:</b>	Standard discharge roller	Ultra fine discharge roller
<b>Working width:</b>	1300mm (52")	1300mm (52")

Optional extras:

- Ultra fine discharge roller (for pure bent seed only)  
Code: **FS1059**
- Standard discharge roller (for rye grass/fescue)  
Code: **FS1057**

### Tractor Mounted Sweepers

# Litamina & Litamisa

## Enhance the aesthetic presentation of your pitch

Sweepers specially designed for large areas.

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Litamina 1200

Proudly used by  
Royal Wellington Golf Club

Collection and removal of surface debris is an important part of any maintenance programme. Whether it is following scarifying or core aeration or simply collecting leaves or litter, the process must be carried out without damaging the turf.

Ideal for fine or outfield turf the SISIS range of easily adjustable tractor sweepers have spiral designed brushes that drive the debris into large capacity hoppers whilst following ground contours.

#### Unique features:

- Collects wide range of debris including leaves, pine needles, grass, thatch, cores, litter
- Spiral design brush for effective collection
- Ideally suited to follow ground contours
- "No tools" required simple brush adjustment
- Galvanised collection hopper for long life
- Large capacity hopper
- Standard cat 1.3 point linkage for simple connection

Tractor Mounted Brushes

# Flexibrush & Varibrush

Delivering an outstanding finish

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Image shows Flexibrush

A range of tractor mounted brushes designed for fast effective brushing on large areas such as golf fairways and sports grounds.

Ideal for brushing in top dressings, dew dispersal, striping for improved presentation and lifting grasses prior to cutting.

Flexibrush unique features:

- Brush sections float to follow ground contours
- Outer sections fold for transport and storage
- Supplied with stand and castors for easy movement when storing
- 3 point linkage

The brush sections on the Flexibrush model float to follow ground contours with the outer sections folding hydraulically for ease of transport and storage.

The Varibrush model has a multiple brushing action to allow maintenance to be completed with fewer passes therefore reducing compaction.

A choice of three mounting options are available for the Varibrush ensuring it can be used on a variety of vehicles.

Model:	Flexibrush
Code:	FS1033
Working width:	5350mm (214")
Min Tractor requirement:	18hp

Flexibrush

Varibrush

Varibrush unique features:

- Brush frame is reversible to allow brush wear
- Adjustable drawbar for towing height and length
- Easy to handle and attach
- Multiple action means fewer passes and therefore reduced compaction

Model:	Varibrush
Options	Code
With 3 point linkage mounting frame	FS1029B
With manual lift towing frame & ball hitch	FS1024B
With electric lift towing frame & ball hitch	FS1027B

Units are complete with wheels

Working width:	1850mm (74")
Min Tractor requirement:	18hp mounted - 12hp towed

Adjustable wheels (Varibrush)

Towed Interchangeable Roller or Brush Unit

# Flexi400

Fast and effective coverage of golf fairways and sports grounds

Discover

An interchangeable unit which has been specifically designed for fast and effective coverage on large areas such as golf fairways and sports grounds.

The unit has seven fully floating heads which allows it to follow ground contours.

Fitted with either roller or brush heads, it is ideal for the removal of dew, striping for improved presentation, lifting grasses prior to cutting, or brushing in top dressings.

Unique features:

- Fast and effective ground coverage
- Easy to handle and attach
- Seven floating heads
- Easy to store and transport
- Attachable by either 50mm ball hitch or clevis pin

<b>Model:</b>	<b>Flexi400</b>
Code:	<b>FS1273</b>
Description:	Towed unit with rollers
Working width:	4000mm (158")
Power unit requirement:	15hp minimum

Optional extras:

Brush heads	<b>800230</b>
-------------	---------------

Attached and ready for action

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Arms in folded position for ease of storage

Tractor Mounted Spreader & Top Dresser

# Powaspred

Discover

The Powaspred will spread most free flowing materials including sand, loam, rock salt, rubber crumb and hard porous dressings at the desired rate with an even consistent spread.

Unique features:

- Infinitely variable spreading rates
- Oscillating base plate to reduce bridging
- Rotating brush at point of discharge to ensure even spread
- 4 tyres on a twin axle to avoid marking and to spread load on fine turf

<b>Model:</b>	<b>Powaspred</b>
Code:	<b>FS0780</b>
Operating width:	1200mm (48")
Min tractor requirement:	15hp minimum

Ideal for:

Football, Hockey, Rugby | Cricket | Golf | Local Authority & Contractors

Close up of the rotating brush and oscillating plate

Discover the full specification and see the Powaspred in action at [www.sisis.com](http://www.sisis.com)

# Hand Tools

Pedestrian Spreader & Top Dresser

## Truspred

A versatile hand operated spreader and top dresser for the accurate even application of grass seed or top dressing material.

Particularly useful for applying top dressing to small areas such as cricket squares, bowling greens, golf greens and tees and lawns.

### Unique features:

- ▶ Simple to set spreading rates
- ▶ Ribbed rubber conveyor belt for accurate placement
- ▶ Carrier wheels permit spread right to the edge of bowling greens

**Model:** Truspred

**Code:** FS1174

Working width: 900mm (36")

### Ideal for:

Bowls, Croquet, Tennis | Cricket | Golf | Lawns

Image shows Truspred

\*Please note a carriage charge will be applied to hand tool equipment

Discover the full specification and see the Truspred in action at [www.sisis.com](http://www.sisis.com)

# Dragmats

Ideal for rubbing in dressings and routine surface renovation.

Model:	Hand Pulled	Hand Pulled/ Towed	Towed
Code:	FS1036	FS1242	FS1037
Working width:	1.35m wide x 1.2m	1.8m wide x 1.2m	2.7m wide x 1.2m

# Trulute

Reversible levelling grid with different profiles for use on turf, shale and gravel surfaces. One side has smooth edges for spreading top dressing and levelling whilst the other side has sharp edges for working in top dressings and levelling back high spots. Folding handle for ease of transportation and storage.

**Model:** Trulute

**Code:** FS0302

Working width: 600mm (24")

\*Please note a carriage charge will be applied to hand tool equipment

Discover the full specifications and see the hand tools in action at [www.sisis.com](http://www.sisis.com)

# Aerdrain Fork

Simple but effective aeration fork with interchangeable tines for year round use.

<b>Model:</b>	<b>Aerdrain Fork (Less Tines)</b>	<b>96mm Long Pencil Tines (Set Of 5)</b>	<b>127mm Long Hollow Tines (Set Of 3)</b>
<b>Code:</b>	<b>FS1144</b>	<b>SETX5-D1534</b>	<b>SETX3-D1535</b>

# Trulevel Roller

Ideal bowling green roller which can be pulled or pushed with ease to firm the soil without compaction. Overriding action on slight hollows allows areas to be firmly rolled whilst low areas are left so that the playing surface is progressively levelled. Outer rollers can be raised concentrating the weight on the centre roller if desired.

<b>Model:</b>	<b>Trulevel (120kg Roller)</b>	<b>Additional Weights (Set Of 2)</b>
<b>Code:</b>	<b>FS0801</b>	<b>FS1257</b>
<b>Working width:</b>	900mm (36")	

# Bray Hand Tools

Ideal for overseeding and aerating small areas on bowling greens, tennis courts, golf greens, tees and ornamental lawns.

- Interchangeable reels between slotter and spiker
- Encourages rapid germination and stronger growth
- No loss of play and no top dressing required.

<b>Model:</b>	<b>Hand Slotter</b>	<b>Additional Slotter Reel</b>	<b>Hand Spiker</b>	<b>Additional Spiker Reel</b>
<b>Code:</b>	<b>BS002</b>	<b>BS005</b>	<b>BS004</b>	<b>BS003</b>
<b>Working width:</b>	250mm (10")	250mm (10")	250mm (10")	250mm (10")

\*Please note a carriage charge will be applied to hand tool equipment

# Ferret

Ideal tool for roughing up small bare areas such as foot holes on a cricket square where ongoing repairs are required throughout the year. The tool incorporates an offset star wheel to create a tilth. Folding handle for ease of transportation and storage.

<b>Model:</b>	<b>Ferret</b>
<b>Code:</b>	<b>FS0826</b>
<b>Working width:</b>	250mm (10")

# Dragbrush

Heavy duty dragbrush for brushing in top dressing, removal of dew and for brushing and levelling hard porous areas.

<b>Model:</b>	<b>Dragbrush</b>	
<b>Code:</b>	<b>FS1166</b>	<b>FS1248</b>
<b>Working width:</b>	1800mm (1.8m/72")	2400mm (2.4m/96")

# Combirake

Simple to use combined rake and brush for use on small turf areas. Downward pressure is applied by gentle pressure on the handles. Folding handle for ease of transportation and storage.

<b>Model:</b>	<b>Combirake</b>
<b>Code:</b>	<b>FS0932</b>
<b>Working width:</b>	690mm (28") rake 910mm (36") brush

\*Please note a carriage charge will be applied to hand tool equipment

# Gaining knowledge from the experts

The Dennis and SISIS education seminars are popular events hosted at clubs and facilities across the UK and overseas.

Attending delegates receive a wealth of practical and theoretical insight from our carefully chosen expert speakers and the seminars represent a unique opportunity to share knowledge, experience and best practice.

Seminar programs focus on specific sports surfaces. A wide range of topics are covered including machinery maintenance, fertilizers, top dressing, seeds and disease. The Q&A sessions at the end of the day gives everyone an opportunity to ask their questions.

“

“You are never too old and never too experienced to learn something new, there are always new techniques to discover. That could be through the practical demonstrations, through the talks or even by chatting to your fellow grounds staff because you find that you really do learn from one another. An event like this is a fantastic way to develop those networks and get to know other people who are having the same issues as you.”

Alex Vickers  
Turf Consultant

“

“90 years of experience have taught us many things – including that you don’t get to be the best overnight.

Like the world class sportsmen who play on SISIS maintained pitches demonstrate, it takes skill, dedication and a willingness to learn to reach and stay at the top of the game.”

Contact us on 01332 824777 for details of our next series of seminars

# A helping hand from Team SISIS

## Access to all the information you need

The SISIS website is a constantly evolving source of useful and practical information for SISIS users. You can watch videos of machines in action, learn valuable tips about turf maintenance and download operating manuals on all SISIS products at your convenience – any time, any day.

## Experience our excellent network of dealers

The dealerships that represent SISIS products are carefully selected to ensure customers receive first class professional support including machine service, spare parts, technical support and product demonstrations. Whatever you need, our dealers will always be there to help.

## Next day spare parts

At SISIS we understand the importance of reducing machine downtime so we carry a vast stock of spare parts, all of which can be dispatched next day delivery through our specialist dealer network.

In addition, our online resource of operator manuals now makes it even easier to identify the correct part number.

We keep *good company* SISIS supports industry associations through corporate membership, which include:

# »»» warranty «««

We provide a two year 'peace of mind' warranty upon receipt of a completed warranty registration.

# Built with experience

Creating the perfect looking turf is the ultimate aim of all grounds staff, greenkeepers and gardeners the world over.

Whether in preparation for a prestigious event at a national stadium or a leisurely Sunday afternoon at the local sports club, your turf's appearance is everyone's first impression.

The team at Dennis shares your pride in creating the best. That's why we are so passionate about

the products we design, make and test at our Derbyshire factory. Every mower is hand built by experienced engineers, drawing on a long tradition of quality manufacturing and using only the best most reliable materials and components.
