345HD & MD

Seeder & Drag Brush Attachment

The latest attachment for the Groundsman 345HD/MD Pedestrian Turf Aerators, is the Groundsman Seeder & Drag Brush. The one pass operation, consists of a front hopper distributing the seeds evenly ahead of the tining unit, followed up by a brush which efficiently spreads surface seeds down into the seed beds.

A combined drag brush and roller attachment is also available on request.

- Even Distribution of Seeds on any sports turf surface
- Flawless and easy seeding of your green in One Pass
- Consistent depth of seed bed for better Germination
- Attach and remove for use, when and where you need it
- Compact and easy to attach straight onto your Groundsman 345HD/MD
