## THE NEW KIOTI K9 2410 UTV

KIOTI have launched the K9 2410 utility vehicle (UTV), keeping up their philosophy of continual product development. Based on the popular K9 2400, the 2410 increases operator comfort and safety. An upgraded CVT transmission produces a homologated 50 kph road speed. Whilst speed proportional electric power-steering (EPS) and an engine-brake improve handling and performance.

The generously sized rear load area, ability to carry three people, 4WD and high ground clearance make the K9 2410 well suited to multiple jobs around estates, golf course and sports facilities, farms & equine yards.

Customers can customise the 2410 by selecting the cabin option and colour to suit their needs. The 2410 is available with either a climate controlled factory fit cabin, a ROPS frame with door, windscreen and canopy options, or a retro fit field cabin. As standard the K9 is available in KIOTI red, with the option of green for customers requiring a more subtle colour.

**2 YEARS'**  
(Unlimited Hours)  
**WARRANTY**

### KEY HIGHLIGHTS

- CVT transmission with 50 km/hr homologated road speed.
- **Increased speed saves time.**
- ROPS, field cabin & climate controlled factory cabin.
- **Greater customer choice.**
- Speed proportional (EPS) electric power-steering.
- **Easier & safer turning at all speeds.**
- Engine-brake.
- **Safer travel at speed or downhill.**
- Electric bed tipping (opt).
- **Effortless unloading.**
